

LISAM SYSTEMS

Global IT Solutions in Environment, Health & Safety

ExESS® Waste Management Module

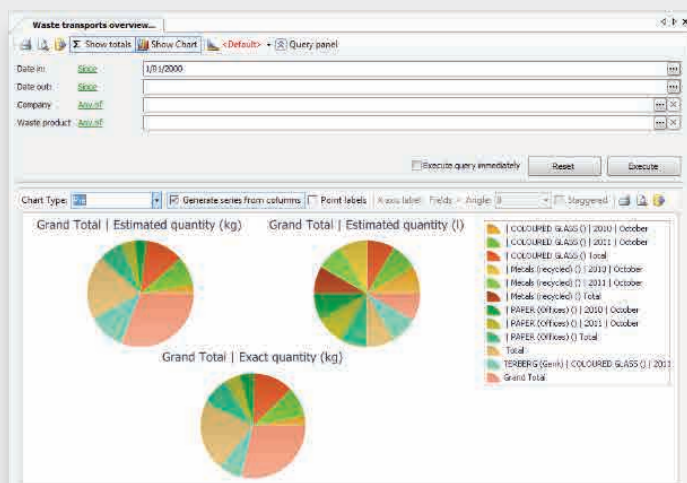

Thanks to ExESS Waste Management, easily handle the waste production and disposal data of your company in a single place to efficiently comply with all the global hazardous waste regulations.

Waste Reporting Tool

ExESS Waste offers the needed reporting options to easily analyze and keep track of all the hazardous waste data. Easily sum your waste quantities and download them through an easily customizable and structured template.

Also print the right hazardous waste labeling information and transport documents in just a few clicks. From the identification of actors to invoicing, ExESS is the best tool to cover all the steps of the waste management process.

Automated generation of tasks

Color-flagging of close deadlines

Automatic e-mail warnings

Waste reporting on demand

Your Solution for Waste Management

ExESS includes all the required functionalities for a safe and responsible disposal of all the hazardous waste managed in your establishment.
